To the international providers of pharmaceuticals

Certificate of national purchasing mandate - Sweden

The National Board of Health and Welfare has been commissioned by the Swedish Government to secure availability to pharmaceuticals useful in the care of patients with the disease covid-19.

The governmental commission includes co-ordinated purchases of the pharmaceutical products.

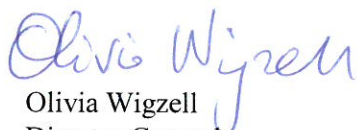

The National Board has asked four Swedish healthcare regions to carry out the necessary purchases of the aforementioned products in order to secure the national requirements.

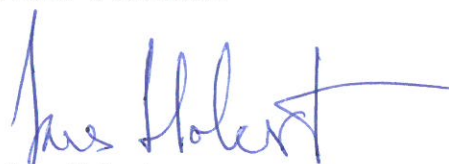

The regions are as follows.

- I. Region Stockholm
- II. Region Skåne
- III. Region Västra Götaland
- IV. Region Östergötland

Each of these regions is empowered to make the purchases of national interest and significance for Sweden in their own name.

THE NATIONAL BOARD OF HEALTH AND WELFARE
